Q1)

main.py

Visualize

Run

```
words = {
    "analyzing": ("analyze", "Suffix: -ing", "Inflectional"),
    "analysis": ("analysis", "No clear suffix", "Irregular derivational relation"),
    "analytical": ("analysis", "Suffix: -ical", "Derivational")
}

for word, (root, affix, kind) in words.items():
    print("\nWord:", word)
    print("Root:", root)
    print("Affix:", affix)
    print("Type:", kind)
    print("Normalized:", "analyz")
```

Output

```
Word: analyzing
Root: analyze
Affix: Suffix: -ing
Type: Inflectional
Normalized: analyz

Word: analysis
Root: analysis
Affix: No clear suffix
Type: Irregular derivational relation
Normalized: analyz

Word: analytical
Root: analysis
Affix: Suffix: -ical
Type: Derivational
Normalized: analyz
```

Q2)

main.py

Visualize

Run ▶

```python
words = {
    "activate": ("", "act", "-ivate", "Verb"),
    "activation": ("", "activate", "-ion", "Noun"),
    "reactivation": ("re-", "activate", "-ion", "Noun")
}

for word, (prefix, root, suffix, category) in words.items():
    print("\nWord:", word)
    print("Prefix:", prefix or "None")
    print("Root:", root)
    print("Suffix:", suffix or "None")
    print("Word class:", category)
    print("Normalized:", "activate")
```

Output

```
Word: activate
Prefix: None
Root: act
Suffix: -ivate
Word class: Verb
Normalized: activate

Word: activation
Prefix: None
Root: activate
Suffix: -ion
Word class: Noun
Normalized: activate

Word: reactivation
Prefix: re-
Root: activate
Suffix: -ion
Word class: Noun
Normalized: activate
```

Q3)

main.py

Visualize

Run ▶

```python
words = {
    "create": ("None", "Base form", "create"),
    "creates": ("-s", "Third-person singular", "create"),
    "creating": ("-ing", "Present participle", "create")
}

for word, (suffix, category, root) in words.items():
    print("\nWord:", word)
    print("Suffix:", suffix)
    print("Grammatical category:", category)
    print("Root:", root)
    print("Normalized:", root)
```

Output

```
Word: create
Suffix: None
Grammatical category: Base form
Root: create
Normalized: create

Word: creates
Suffix: -s
Grammatical category: Third-person singular
Root: create
Normalized: create

Word: creating
Suffix: -ing
Grammatical category: Present participle
Root: create
Normalized: create
```

Q4)

main.py

Visualize Run ▶

```python
words = {
    "disagree": ("dis-", "agree", "", "Prefix"),
    "agreement": ("", "agree", "-ment", "Derivational"),
    "agreeable": ("", "agree", "-able", "Derivational")
}

for word, (prefix, root, suffix, kind) in words.items():
    print("\nWord:", word)
    print("Prefix:", prefix or "None")
    print("Root:", root)
    print("Suffix:", suffix or "None")
    print("Type:", kind)
    print("Meaning:", {
        "disagree": "Not agree",
        "agreement": "State of agreeing",
        "agreeable": "Pleasant or acceptable"
    }[word])
    print("Normalized:", root)
```

Output

```
Word: disagree
Prefix: dis-
Root: agree
Suffix: None
Type: Prefix
Meaning: Not agree
Normalized: agree

Word: agreement
Prefix: None
Root: agree
Suffix: -ment
Type: Derivational
Meaning: State of agreeing
Normalized: agree

Word: agreeable
Prefix: None
Root: agree
Suffix: -able
Type: Derivational
Meaning: Pleasant or acceptable
Normalized: agree
```

Q5)

main.py

Visualize

Run

```python
words = {
    "govern": ("govern", "None", "Base"),
    "government": ("govern", "-ment", "Level 1"),
    "governance": ("govern", "-ance", "Level 1")
}

for word, (root, suffix, level) in words.items():
    print("\nWord:", word)
    print("Root:", root)
    print("Suffix:", suffix)
    print("Derivational level:", level)
    print("Normalized:", root)
```

Output

```
Word: govern
Root: govern
Suffix: None
Derivational level: Base
Normalized: govern

Word: government
Root: govern
Suffix: -ment
Derivational level: Level 1
Normalized: govern

Word: governance
Root: govern
Suffix: -ance
Derivational level: Level 1
Normalized: govern
```
